Kilgore, TX. 75662

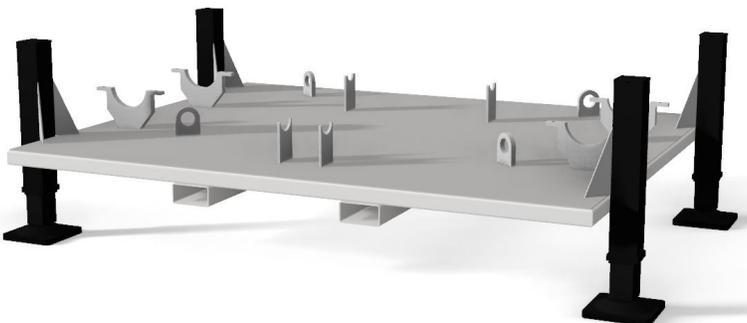

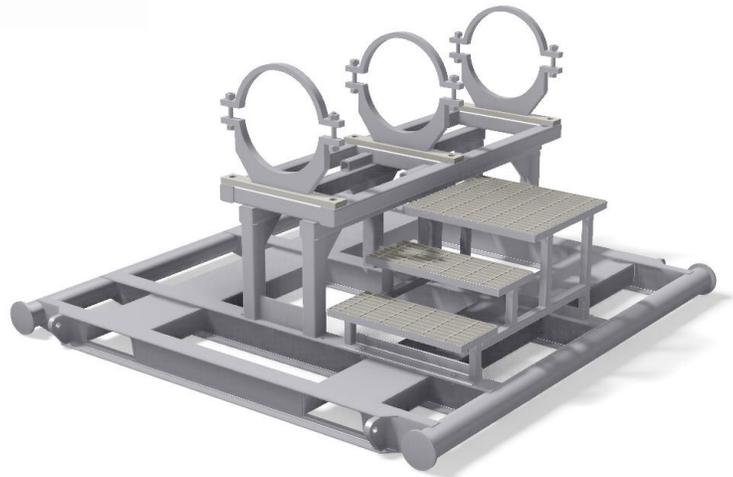

TSI Fabrication builds structures such as workbenches, pipe racks, support skids, API valve repair platforms. TSI offers custom frames and skids to install your choke manifolds, drilling pressure control manifolds, frack stimulation manifolds and other unique process equipment. TSI can assemble and install your unique equipment on frames of your design or our well-crafted products. TSI's solutions do not end with each sale. We constantly are involved and interact with our oil and gas clients to improve our product offering. You can benefit from years of experience that TSI has obtained through its knowledge of customer needs and their niche applications.

SKIDS

CAPABILITIES:

- In house water automated plasma cutter
- In house pipe profiler
- Extensive structural experience
- 3D modeling software
